

Field measuring equipment shall be available at all times and the field intensity at each of the monitoring points shall be measured at least once every seven days and an appropriate record kept of all measurements so made.

DESCRIPTION OF AND FIELD INTENSITY AT MONITORING POINTS:

Direction of 17.9° true North. From the transmitter, turn right onto Highway 6 and proceed south approximately 2.8 miles. Turn left onto Santee State Resort Park road, Highway 105. Continue 2.35 miles to an intersection and turn left, remaining on the marked route of Highway 105. Continue approximately 1.8 miles to the intersection with Route 563, Poplar Creek Road, and turn right. Continue 0.4 miles to the point, which lies along the western edge of the road. This is point number 34 of the radial N- 17.9° -E, and is located 2.82 miles from the array. The field intensity measured at this point should not exceed 2.77 mv/m.

Direction of 49° true North. From the transmitter, turn right onto Highway 6 and proceed south approximately 2.8 miles. Turn left onto Santee State Resort Park road, Highway 105. Continue 2.35 miles farther to an intersection and turn left, remaining on the marked route of Highway 105. Continue approximately 0.3 mile to the point, which lies approximately 10 paces up a dirt lane leading south from Highway 105. This is point number 20 of the radial N- 49° -E, located 2.3 miles from the transmitter. The field intensity measured at this point should not exceed 25.2 mv/m.

Direction of 71.9° true North. From the transmitter, turn right onto Highway 6 and proceed south approximately 2.8 miles. Turn left onto Santee State Resort Park road, Highway 105. Continue 2.35 miles to an intersection and turn right. Continue 0.8 mile to a fork, where the point is located approximately 30 feet west of a gate along the north shoulder of a road leading to lake access and camping facilities. This is point number 22 of the radial N- 71.9° -E, and lies 2.6 miles from the array. The field intensity measured at this point should not exceed 2.52 mv/m.

Direction of 242.7° true North. From the transmitter, turn left onto Highway 6 and continue north 1.2 miles to the intersection with State Road 1467. Turn left onto this road and continue 1.1 miles to the intersection with Highway 81. Turn left onto 81 and continue 1.0 mile to an intersection with a gravel road on the right. Turn onto this gravel road and continue 0.1 mile to the point, which is located in the middle of the road immediately south of a small ditch and tree line. This is point number 18 of the radial N- 242.7° -E, and lies 1.8 miles from the array. The field intensity measured at this point should not exceed 65 mv/m.
